Subject: Nichols Gravel Ltd. - Reply Letter for Permit To Take Water

re:

This note is in response to your draft letter of November 5, 2002, to Nichols Gravel Ltd. that you sent to our MNR office for review.

The following is a list of points that our MNR office considers important to be included in the letter to Nichols. These points relate to the facts of the issues at hand, and interrelate with our MNR investigation and the licensing process ongoing with Nichols.

1) Present exactly what your inspectors witnessed at the site on the day of Sept. 5, 2002. They were also told onsite by Gary Nichols that their was pumping of water recently.

2) Refer to former letters where Nichols advised the MOE that he was going to start pumping water for an irrigation pond. The guy admitted in writing that he was going to start pumping. (March 6, 2002 letter to MPP - your office was sent a copy)

3) Stress immediate need for the P/TTW Permit - Your Ministry knows he has pumped water and is in the water table as pointed out on the Mining MNR site plans

4) Deal with the future processing points of the Permit. Outline in steps what studies or factors Nichols has to do for the Permit (ie. Hydrogeology Study)

5) Don't deal with the untrue statements in the application. Nichols is constantly snowbailing Ministry staff (MOE and MNR) in order to justify his illegal proceedings.

The largest aspect our MNR Ministry would like to see is that the Permit continue to be processed in a pro-active and a constructive manner.

Thank you for the opportunity to provide comments.

Regards,

Paul Cutmore
